# 1. User Management

- **Non-AD User**

Go to the browser and provide the below URL and the user would be navigated to the SG Templates application Login module

<https://sgeas.sginternal.com/sgtemplate/#/>

QA URL : <https://qa-alpha-portal.safe-guardproducts.com/sgtemplate/#/>

The image shows a login form for SAFE-GUARD Products International. It features a white background with a light gray border. At the top center is the company logo. Below it are two input fields: 'Username \*' and 'Password \*'. At the bottom are two buttons: 'Login' and 'Cancel'.

Provide the username and the password. Clicking on the Login button the user would be able to login to the Intellarate application.

On providing invalid credentials the user will be notified with an error message ‘Username and/or Password is incorrect’

- **Creation of EAS AD user**

An SG user can create AD user credentials by following the below mentioned steps

Go to the below mentioned URL:

<http://ng-sgeas.etch.com/sgeas/>

the user will be navigated to the below mentioned page.

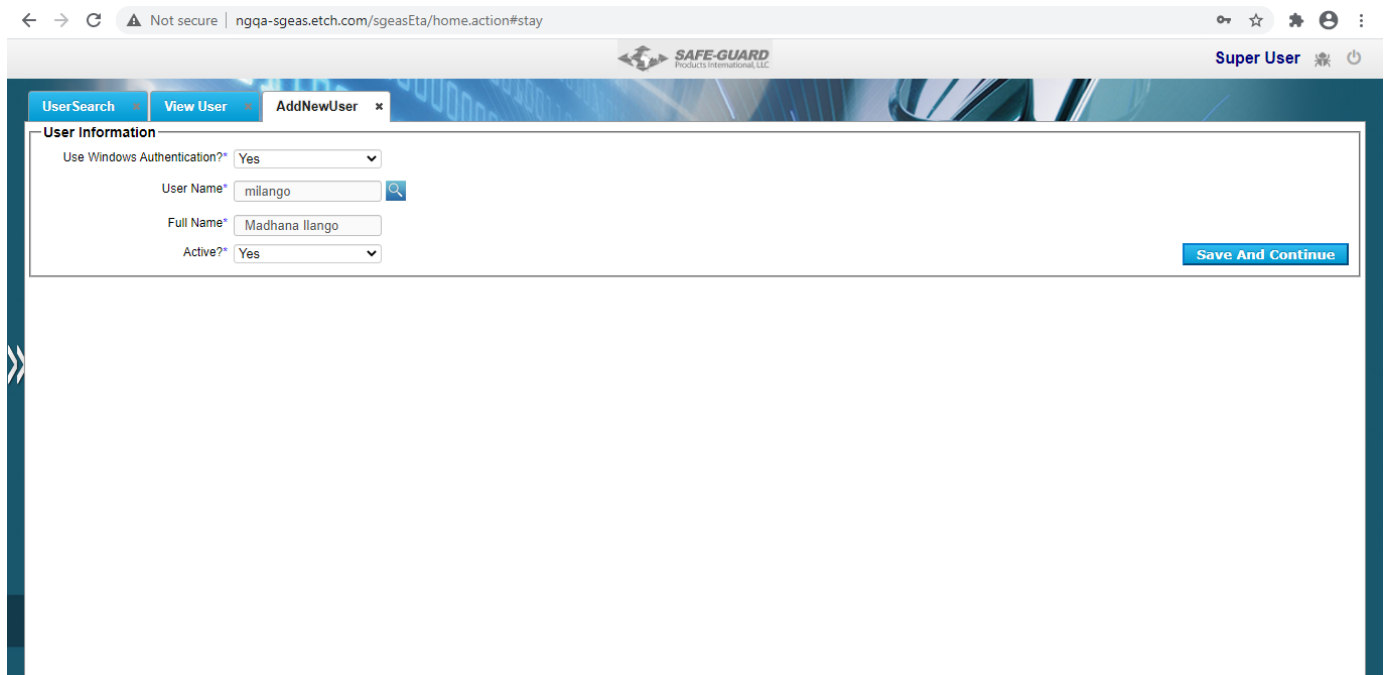

1. Provide the login credentials to login to the EAS application. After login to the module user can see the below module
2. Clicking on the marked user will see the dropdown/sidebar with different labeling.
3. Select Add New option from User Role Management menu

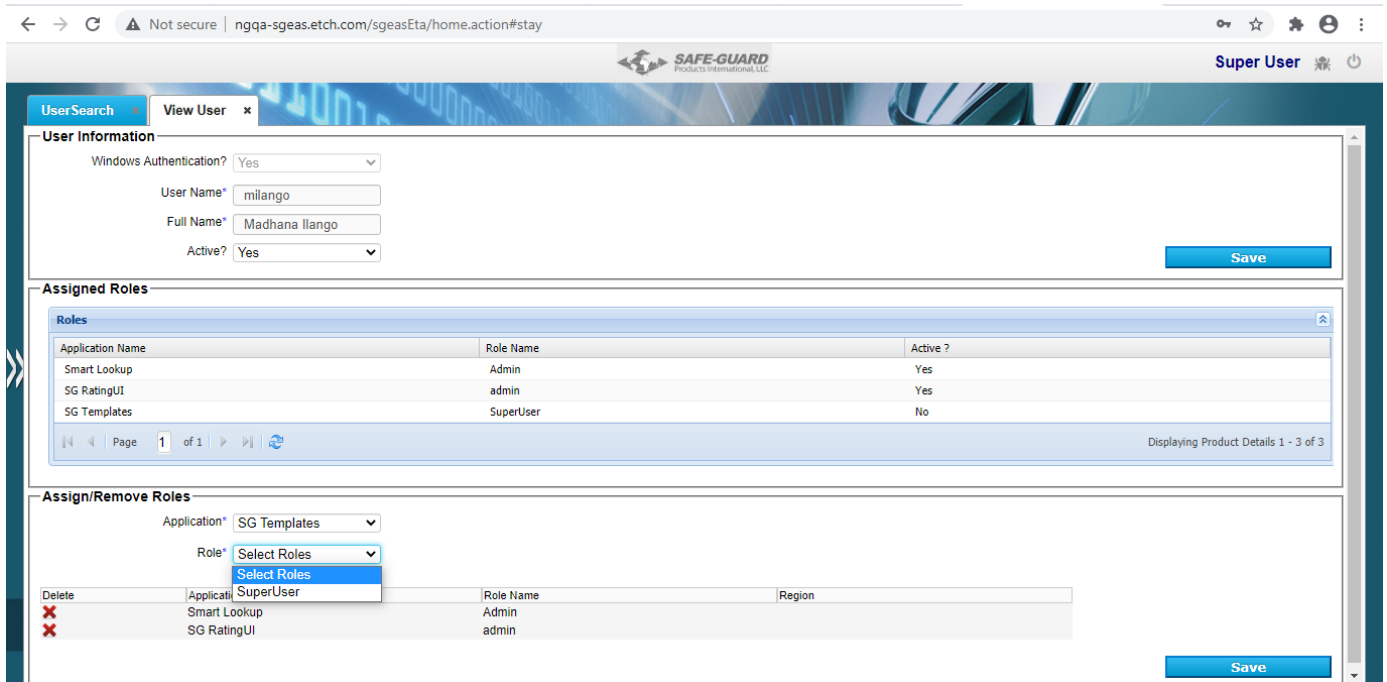

4. On Clicking the add new option user should be able to see the below screen for adding users.

5. select Use Windows Authentication as “Yes” for creating Windows/ LDAP authentication users
6. select valid username from the list of users and click on Save and Continue.

7. Select SG Templates application, and Superuser role and click on Save.

The screenshot shows the 'View User' interface for a user named 'milango'. The 'User Information' section includes fields for 'Windows Authentication?' (Yes), 'User Name' (milango), 'Full Name' (Madhana Ilango), and 'Active?' (Yes). A 'Save' button is present. Below this is the 'Assigned Roles' section, which displays a table of roles assigned to the user.

Application Name	Role Name	Active ?
Smart Lookup	Admin	Yes
SG RatingUI	admin	Yes
SG Templates	SuperUser	No

Below the table is a pagination bar showing 'Page 1 of 1' and a 'Displaying Product Details 1 - 3 of 3' message. The 'Assign/Remove Roles' section shows a dropdown for 'Application' set to 'SG Templates' and a dropdown for 'Role' set to 'SuperUser'. A table below this shows the roles assigned to the user, with a 'Delete' column and a 'Save' button at the bottom right.

Delete	Application	Role Name	Region
✗	Smart Lookup	Admin	
✗	SG RatingUI	admin	

Once user clicks on save. The user will get created with valid role.

8. User should be able to login to the SG Templates application using their AD credentials to the below mentioned URL.

<https://sgeas.sginternal.com/sgtemplate/#/>
